Gary,
I believe that everything Don mentioned has already been reviewed and produced in CES's pending litigation against the City. I can easily burn a CD of these materials rather than Don xeroxing them again.

Let me know what meets EPA's needs.

James

Great,

That makes life much easier. I'll update you when I know more.

Thanks

Don

Right now, I am just looking for a database file that tracks the complaints. If I need more detail, I will call you guys back.

Thanks

Gary

Subject: Information request

Gary,

When the last spill at CES occurred, I was assigned to facilitate communications between the different HDHHS Bureaus working on the problems at CES and our Legal Department. With that in mind, I would like clarification on what information you actually require from us and for what time frame.

I understood that you are looking for additional documentation in order to help understand and demonstrate the need for EPA action at this site. Are you asking for full investigation reports and supporting documentation for each event that occurred after the facility closed or merely an event table such as the summary of complaints table in Excel that was supplied for the period (2005 – 2011) prior to the facilities closure? The detail required will determine the effort needed to produce the documents and whether or not our Legal Department may need to become involved to review or release of those documents.

Let me know at your earliest convenience.

Thanks
